

Technical Design Document [as built]

Architecture

One new service class behind the existing users router

Sequence / Data Flow

- client -> api -> service -> repository -> csv

APIs

- POST /api/v1/users/{id}/export

Database Changes

- [none]

Impacted Files

- app/api/users.py

- app/services/exporter.py

Decisions

- synchronous export for v1; async job if rows exceed 50k

Tests

- [none]

Security Considerations

- ownership check

- no PII in logs
